Technical support (Google Certificate)

Expertise

- Html/Html5
- Version Control
- Css/Css3/bootsrap
- JavaScript/node.js
- React
- Linux/git/gitHub

Language

English

Malay

Front-end developer

I aim to utilize my expertise in HTML, CSS, JavaScript, and React to build visually appealing, user-friendly, and responsive websites and applications that meet client requirements and improve the overall user experience. I am also eager to learn back-end and blockchain technology in the future. If your company is looking for someone who is open to learning new things, I am eager to be a part of the team.

"we live to grow"

Experience

2023

UpWork Ipoh, perak

Fronnd end developer

"I helped a friend of mine with their assignment by using HTML, CSS, JavaScript, and hosting it on Github. You can view it in my e-portfolio under the section "Recent Projects."

2022

Double Happiness Sdn Bhd Manjung, Perak

Ui/Ux Designer

I designed and developed a hotel website for my current company to help increase their visibility through optimized SEO and advertising, and to make it easier for customers to choose the most suitable room.

2021

Ipoh, Perak

Front end developer (internship)

Having completed my front-end course, I coded my portfolio and delved deeper into learning techniques. I created a card game, designed a beautiful website, and made my services available to the world. This marked the beginning of my freelancing journey.
